Dear Mr. Greis,

As you know, we purchased your company's model WT50 high volume liquid media system in 2003 to replace a competitive model that had been in use for several years. While both systems featured submerged pumps and closed loop filtration, I am pleased to report our complete satisfaction with the equipment, the training that you provided, along with your company's ongoing support. Both our operators and maintenance staff had a great deal of experience with the old equipment. The operators are very pleased with the efficiency and ergonomic improvements, and the maintenance people have marveled over the minimum downtime required for PM, which is a fraction of what it used to be. Consider this a letter of recommendation for your company and products.

Best Regards,

Chad Phillips  
Operation Manager
