Re: Etch Line 2 Hoist Automation

Dear Mitchell,

I wanted to let you know that your WT50SS wet blast cabinet works great! All my floor operators are very much impressed by how quiet yet powerful it is. It's definitely the best manual wet blast we have on our floor. Setup was easy and running it was very intuitive. There was very little time involved with getting it up and ready for production.

From an engineering standpoint, I appreciated the easy to follow written instructions and detailed schematics provided. This, along with your quick and concise customer support, made this a simple project to implement. Thank you for all your help and I look forward to working with you more in the near future.
